

Lyubomir Dakov

Python web developer

As a junior software developer with 2+ years of experience in Python, personal projects, and completing an internship, I am a motivated quick learner with a passion for technology. I bring strong communication skills, thriving as a collaborative team player, and I'm eager to apply my practical experience and enthusiasm for technology to new challenges.

TECHNICAL SKILLS

Programming Languages

I have a strong foundation in Python, with additional experience in JavaScript and Perl.

Web Frameworks

I have experience with Flask and Django. My last personal project is a REST API application

Databases

MS SQL, My SQL, PostgreSQL

Web Scraping

Utilized Selenium extensively for web scraping and downloading, automating data extraction processes

Data Manipulation

Experience in data analysis and manipulation using Pandas and Polars

Tools

PyCharm, Visual Studio Code, Docker, Git, AWS, Ubuntu

Soft Skills

Teamwork, Communication Skills, Adaptability and work ethic

WORK EXPERIENCE

Junior Software Developer

ISI Emerging Markets Group · Internship

07/2023 - 01/2024

Achievements/Tasks

- Automated web downloading, scraping, and data processing tasks to systematically gather relevant information for projects.
- Resolved 150+ tickets, demonstrating a proactive approach to problem-solving and contributing to the overall efficiency of the development process.
- Implemented new functionalities as a part of bigger project, to extract financial data from documents such as audit reports. Improved user experience by extraction of information about auditors, employees, and other relevant financial metrics.

Sofia

EDUCATION

Python Web Development

Software University (SoftUni) [↗](#)
